

DR. MOY (ON-CAMERA)

Hello and welcome. I'm Dr. Richard Moy, a foot surgeon in Southern California.

If you or someone you know is suffering from foot pain or bunions, you're a big step closer to the cure. Unlike many doctors, whose common surgical techniques lead to post-operative pain and long recovery times, my surgeries are documented to be virtually pain free in 97% of cases.

We've designed this website to be virtually pain-free as well. Instead of just reading pages of text, we've made it easy for you to get the information you need by watching video of actual surgical patients sharing their real-life experiences.

I recently participated in a talk show called Life Beyond Bunions. The entire studio audience for the program was made up of current and former bunion sufferers.

Many members of the audience and on-stage guests were my former surgical patients. But participation in Life Beyond Bunions was 100% voluntary—no one was paid to participate or offer an endorsement.

For website viewing, we've divided the program into short segments for you to enjoy and learn from at your convenience. You can watch as many parts as you like, whenever you like.

On my left are the segment titles. Choose the topic you're interested in to see a brief description of that segment. Click the [play now button] and your screen will come to life with people just like you who've lived with the physical pain of bunions and the fear of trying to eliminate them.

You'll also notice a Play All button—just in case you want to see everything. If you choose this option, you'll still be able to stop and start the video whenever you want.

In addition to the Life Beyond Bunions talk show, you can also watch my original infomercial, produced in 1998, which is as relevant today as it was back then.

Finally, if you want to print out most of the text from the site and get all the information you'll need to take your first step toward Life Beyond Bunions, you'll notice a link at the bottom of the page that lets you download a brochure in either Adobe Acrobat PDF format or Microsoft Word format. This brochure includes everything you need to make an informed decision about pursuing virtually pain-free surgery for yourself or someone else. Like the FAQ tab at the upper right of this screen (GESTURES TO HIS LEFT), it answers a large number of Frequently Asked Questions—the same ones you're like to have.

Of course, if you still have questions after watching and reading, please contact my office for the answer to your specific needs. Better yet, call or e-mail to make a free no-obligation appointment for a consultation with me.

Enjoy exploring this web site and I look forward to meeting you soon to share with you how simple and virtually pain-free surgery can be.
